Bas and Combination Firtures
Pendants. Brackets and Showers
Bas, Combination and Electric Domes

BULLETIN F-3

DISPLAY ROOM AND OFFICES 16-20 OLIVER ST. STOREHOUSE AND SHIPPING DEPT. 275 CONGRESS ST.

The following illustrations show in addition to our former lines, our new line of HIGRADE fixtures. These fixtures are all that the name implies, and customers desiring a snappy line of carefully designed and well-made fixtures would do well to glance over the following good points of the HIGRADE line before placing their orders.

All fixture people know, that if you pay a high price for fixtures, generally speaking, you have a larger assortment and better workmanship. This is true to a certain extent, but it remained for the HIGRADE line to offer both these advantages combined with a comparatively low cost.

These fixtures are packed one in a box, thus positively insuring the customer against missing or crushed parts. This is not only a great advantage to the dealer, who must put these away on his shelves, but also prevents confusion of parts when shipped direct to a house.

There is a label on each box giving length of pipe, length over all and spread; also an illustration showing how the fixture should go together.

We furnish all the arms for these fixtures with iron nipples, cut to proper length, the arm-back of the arm seating firmly against the fixture band. Each cock also has the Boston Key, at no increase in price.

WE CARRY A LARGE STOCK OF THESE IN BOSTON AND BARRING ACCIDENT, CAN SHIP AT A DAY'S NOTICE.

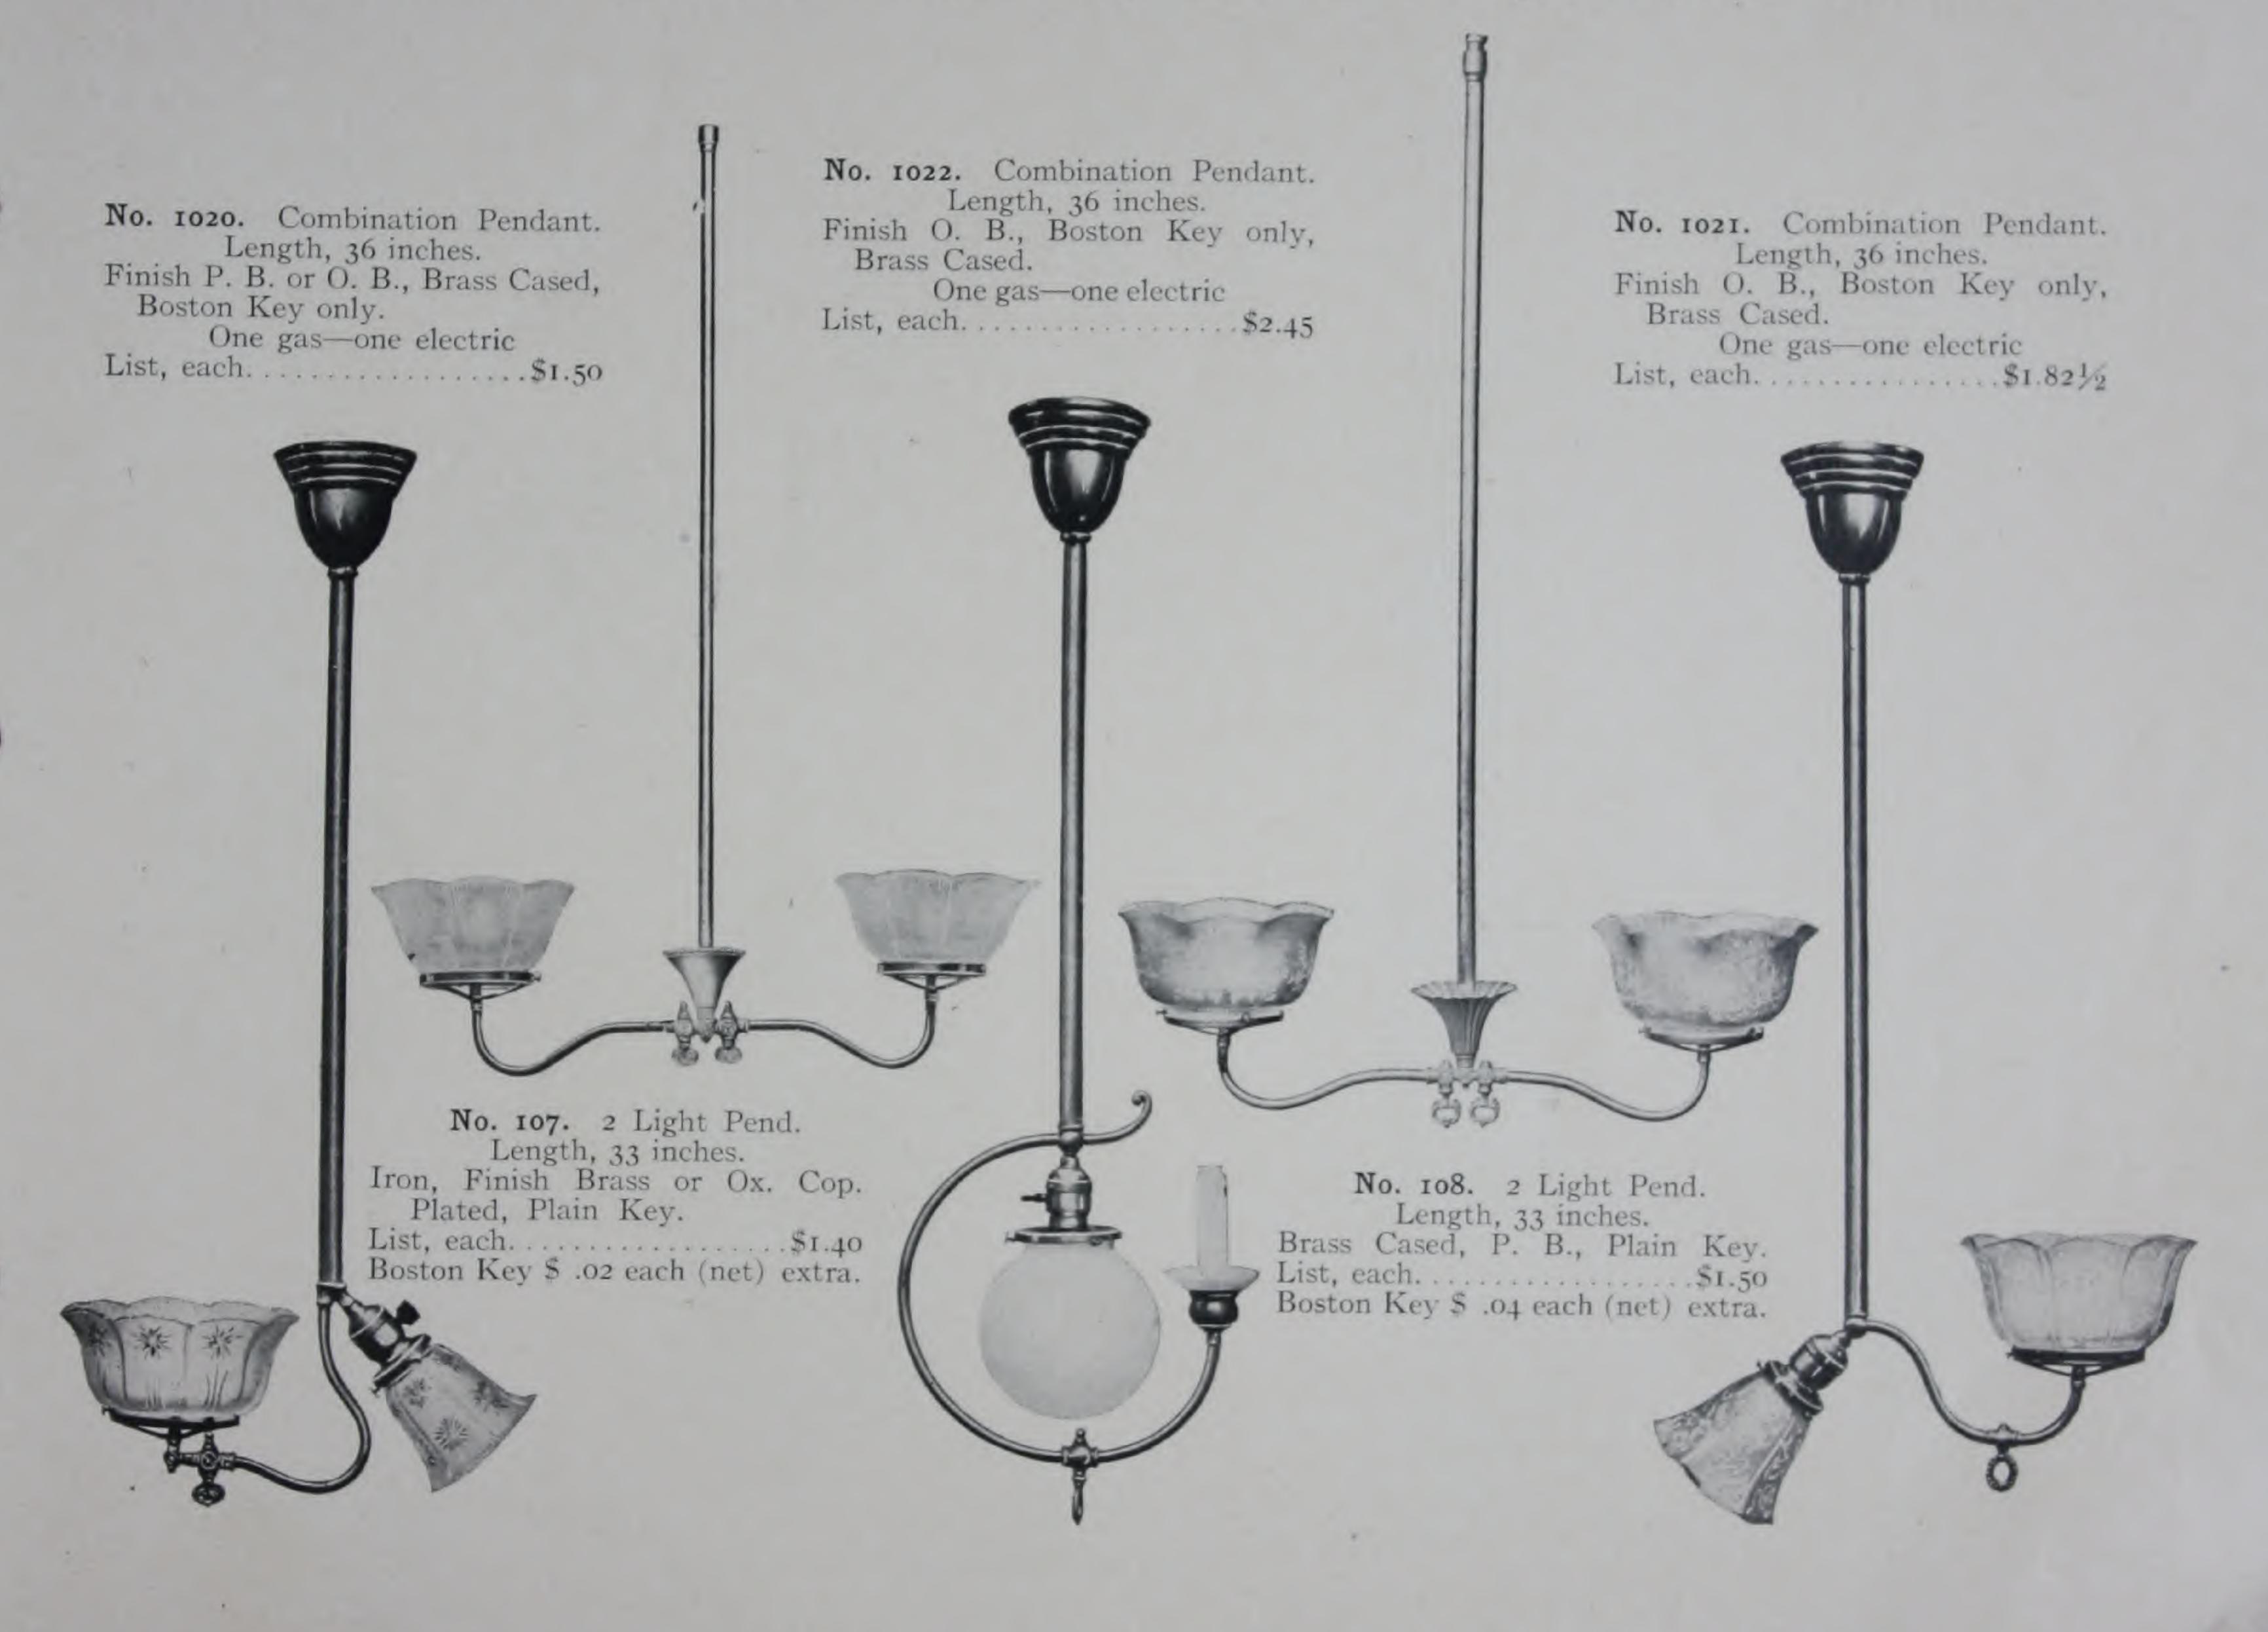

We predict that the HIGRADE line is going to prove the most popular in New England. Full line of samples at our display rooms at 16 Oliver street, where we will gladly show them to you or your customers.

## ==TO THE TRADE==

We wish to call your attention to the domes and showers shown in this catalog. It is very unusual to have such prices combined with the regular Welsbach Quality, but in these few sample cuts shown, you are in a position to "land that job" every time, both on workmanship and design. In designing the showers we have had the key put at the top of the arm directly beneath the pan, which removes it eighteen inches from the mantle, thus meeting the requirements of inspectors in Boston and vicinity and adding to the looks as well. The pans come made up gas-tight; all you have to do is to put on the arms and lights. Each shower is packed at the factory in a special carton to insure you against damaged or lost parts.
